### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Applicants' arguments filed in the Appeal Brief of 18 August 2005 are reconsidered. One having ordinary skill in the art would not conclude that it would have been obvious to include a pitch predictor for weakly-voiced frames. *Gersho et al.* discloses weighted filtering 64 and weighted synthesis filtering 66 (column 14, lines 16 to 20: Figure 4D), but these are not the same as a pitch-prediction filter. *Iyengar et al.* teaches a pitch synthesis filter for certain segments during the beginning of words (column 7, line 43 to column 8, line 49), but although a pitch synthesis filter may be equivalent to a pitch-prediction filter, there is insufficient evidence to show that segments during the beginnings of words are equivalent to weakly-voiced frames. Generally, one skilled in the art would know that a pitch-prediction filter would be most advantageous for frames that are strongly voiced, and therefore have a strong pitch component. However, one skilled in the art would not recognize that a pitch-prediction filter would necessarily be beneficial for weakly-voiced frames. Thus the combination of *Gersho et al.* and *Iyengar et al.* would not render independent claims 1 and 3 obvious to one having ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
